How to Update and Run Brentwood PC Utilities

Run These Utilities Once A Month

Run Down of Utilities: Avast Antivirus free is your real time shield for virus', spyware, and infected mail messages. Malwarebytes' Anti-Malware for removing spyware, Spyware Blaster for preventing spyware, and Ccleaner for deleting all temp files and folders on your pc.

1. Locate the recycle bin on your desktop
2. Right click on the recycle bin and left click on "Run CCleaner".
3. Wait for the red Ccleaner icon in the bottom right hand corner of your screen to finish moving (System tray next to the clock).

1. Locate the Malwarebytes' Anti-Malware in your utilities folder on your desktop.
2. Launch the program by double clicking it.
3. This is the basic user interface. You will see nine tabs. Click the update tab first
4. Then click the check for updates button . Updates will be downloaded and installed automatically.
5. Now click on the scanner tab. Locate the bullet that says "Perform full scan" and click it. Then click scan. Then check C: and uncheck all other drive letters. Then click ok.
6. The scan will run and display the results when finished. This will show you a log file. Close the log file and click ok to finish.
7. Now click remove selected items. Malwarebytes' will now automatically remove everything. If Malwarebytes' wants to reboot to finish the process then click yes. If not then close the program and move on.

1. Locate the Spyware Blaster icon in your utilities folder on your desktop.
2. This utility usually doesn't require any interaction from you, however periodically you will want to launch the application by double clicking on it. Locate the Updates link on the left column of the main page and click it.
3. There will be a button that says Check for updates click it
4. If any updates are found it will automatically download and install these
5. Now locate the link in the left column that says protection and click on it
6. After doing updates locate the heading that says quick tasks
7. Underneath this heading is a link that says enable all protection click this link
8. Now you can close this window
